OBJECT ORIENTED PROGRAMMING
(2019 Pattern) (Semester - III) (218544)

Time : 1 Hour]

[Max. Marks : 30

Instructions to the candidates:

- 1) Answer Q.1 or Q.2, Q.3 or Q.4
- 2) Neat diagrams must be drawn whenever necessary.
- 3) Figures to the right side indicate full marks.
- 4) Assume suitable data, if necessary.

Q1) a) Explain the difference between Procedure and Object oriented Programming languages. [5]

b) Define the fundamentals of Object Oriented Programming like Objects, Classes, Methods, Data Encapsulation and Data Abstraction. [5]

c) Explain the following terms: [5]

- i) Static and Dynamic binding
- ii) Message passing

OR

Q2) a) List the limitations of procedural programming. Explain the need of object oriented programming. [5]

b) Explain the following terms: [5]

- i) Inheritance
- ii) Polymorphism

c) Explain the difference between object oriented and generic programming techniques. [5]

P.T.O.

- Q3)** a) What is Class. Create a class for Student with roll number, name and marks as member variables and calculate percentage and display marks as member functions. [5]
- b) Define encapsulation and explain the types of access modifiers. [5]
- c) Define method overloading. Explain the use of this keyword in object oriented programming. [5]

OR

- Q4)** a) Explain the following terms: [5]
- i) Memory allocation
- ii) Memory recovery
- b) Create a class 'Addition' with read method (to read two numbers), add method (to perform addition) and display method (to display the result). [5]
- c) Explain static keyword. What are the different ways of using static keyword in program? [5]
