B.E. (Computer Engineering)
BUSINESS ANALYTICS & INTELLIGENCE
(2012 Pattern) (Semester - II) (Open Elective - IV)

Time : 2½ Hours]

[Max. Marks : 70

Instructions to the candidates :

- 1) Answer Q1 or Q2, Q3 or Q4, Q5 or Q6, Q7 or Q8.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Assume Suitable data if necessary.
- 4) Figures to the right indicate full marks.

- Q1)** a) Explain with example any one data mining technique used for “Predictive Analytics”. [6]
- b) Explain different components of BI system. [6]
- c) What is OLAP? Explain with example any 2 OLAP operations in detail. [8]

OR

- Q2)** a) Explain with example how Snow-Flake schema helps for storing data warehouse data. [6]
- b) Explain the distributed data warehouse architecture with the help of neat diagram. [8]
- c) Explain the role of Decision Support System for making decisions. [6]

- Q3)** a) Explain Z-score and Decimal scaling normalization technique with example. [8]
- b) Explain following pre-processing techniques for detecting Noise [5]
- i) Regression
 - ii) Clustering
- c) Explain Point outlier detection method with suitable example. [4]

OR

P.T.O.

- Q4)** a) Explain various data Reduction techniques of pre-processing the data. [8]
b) Explain Distance based method of outlier detection. [5]
c) Write short notes on Data cleaning technique. [4]

- Q5)** a) Explain the concept and importance of managing BI system. [8]
b) What is the importance of Business Continuity? List various BI operations required for business continuity. [5]
c) Explain the role of Data source layer in BI infrastructure. [4]

OR

- Q6)** a) Explain various requirements to set up BI Infrastructure. [8]
b) Describe various steps in designing BI system. [5]
c) Explain the need of “Availability” in BI infrastructure. [4]

- Q7)** a) Write short note on : [8]
i) Data Analytics
ii) BI in Marketing
b) Explain Medical application to predict whether disease is Positive or Negative for a particular patient. Assume suitable dataset and model. [4]
c) Explain BI application in Telecommunication system. [4]

OR

- Q8)** a) Explain following Business Intelligence applications. [8]
i) ERP
ii) CRM
b) Explain how BAI system helps in the growth of Banking enterprise. [4]
c) Explain the application of fraud detection in the context of BI. [4]
