CYBER SECURITY

Information and Cyber Security

(2015 Pattern) (Semester - I) (310401)

Time : 2½ Hours]

[Max. Marks : 70

Instructions to the candidates:

- 1) Answer Q1 or Q2, Q3 or Q4, Q5 or Q6, Q7 or Q8.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Figures to the right indicates full marks.
- 4) Assume suitable data, if necessary.

- Q1)** a) List the requirements for good hash function. And explain how it ensures the integrity of data. [8]
b) List difference between MD5 & SHA. [4]
c) Explain Diffie-Hellman key exchange algorithm with example. [5]

OR

- Q2)** a) Explain the RSA algorithm with an example. [8]
b) Explain MD5 with an example. [9]

- Q3)** a) What are the main similarity and differences between qualitative risk analysis Vs quantitative risk analysis? [9]
b) What is cyber stalking and how to prevent it? Enlist example of cyber stalking. [9]

OR

- Q4)** a) What do you mean by ethics in information security? How ethics is important in information security? What are the ethical issues in information security? [9]
b) Describe classification of cyber crime in detail. [9]

- Q5)** a) What is SSL? Explain handshake protocol of SSL? [8]
b) What are various types of firewall? Discuss limitations of firewall. [9]

OR

P.T.O.

- Q6)** a) Explain p~p algorithm in details. [8]
b) Describe briefly how IPsec works and enlist it's applications. Distinguish between tunnel and transport mode of IPsec. [9]

- Q7)** a) Explain need and challenges of intrusion detection system. Define signature based IDS. [9]
b) What is computer worm and virus? How does computer virus spread? How to protect against computer virus and worms. [9]

OR

- Q8)** a) Differentiate spyware, Adware & Ransomware. [9]
b) Define phishing. Explain phishing with types and examples. [9]
