B.E. (Information Technology)
DISTRIBUTED SYSTEM
(2012 Pattern) (Semester - II)

Time : 1 Hour]

[Max. Marks : 30

Instructions to the candidates :

- 1) Answer Q1 or Q2, Q3 or Q4, Q5 or Q6.*
- 2) Figures to right indicate full marks.*
- 3) Neat diagrams must be drawn wherever necessary.*
- 4) Assume suitable data if necessary.*

Q1) a) Define Distributed System. Explain in brief, various influential trends in Distributed Systems? [6]

b) What are various techniques for dealing with failures used in Distributed Systems? [4]

OR

Q2) a) Explain in brief, the various challenges arise in Distributed System design? [6]

b) Compare and contrast cloud computing with more traditional client-server computing. What is novel about cloud computing as a concept? [4]

Q3) a) What is Socket and Streams? Explain java API for UDP datagrams and TCP streams. [6]

b) What is RMI? With suitable diagram, explain how RMI communication happens with stub and skeleton involved? [4]

OR

P.T.O.

Q4) a) What is marshalling and unmarshalling? Explain in brief, three alternative approaches of external data representation. [6]

b) Explain three generations of Distributed Systems with respect to : [4]

- i) Scale
- ii) Heterogeneity
- iii) Openness
- iv) Quality of Service

Q5) What is the key difference between objects and distributed objects? What are the various issues with object-oriented middleware? [10]

OR

Q6) a) What is Routing Overlay? Give in brief, the main task of routing overlay? [6]

b) What are the services offered by CORBA in Distributed Computing System? [4]
